

ALAA ALHARBI

Makkah, Saudi Arabia | 0560677118 | alaaofficials10@gmail.com

PROFESSIONAL SUMMARY

Third-year Microbiology student at Umm Al-Qura University (GPA: 3.33/4.00, expected graduation 2027) with hands-on food safety inspection experience across two consecutive Hajj seasons (1446 & 1447) and cooperative training in quality control, production, and quality assurance at a food industry facility. Applied HACCP principles in high-volume food operations and hold a Highfield Level 3 International Award in HACCP (Passed with Distinction). Combines academic training in microbiological techniques with field experience in hygiene compliance, quality control testing, and inspection reporting. Seeking a laboratory internship to apply microbiology coursework and food safety expertise to microbial analysis, culture media preparation, and shelf-life research in support of food safety and waste-reduction goals.

PROFESSIONAL EXPERIENCE

Production Team Leader — Cooperative Training

June 2026 – Present

Aquat Company for Food Industries

- Completed cooperative training rotating across Quality Control, Production, and Quality Assurance departments at a food industry processing facility
- Learned NCP/NCM classification and supported QC testing using microbiological media, including Baird Parker agar (*Staphylococcus aureus*), *Listeria* agar, and Rappaport-Vassiliadis broth (*Salmonella*)
- Performed melanosis defect testing (ammonia, chlorine, iodine, pH, calcium) and water quality testing (alkalinity, hardness, chlorides, TDS, chlorine) against critical limits (pH 6.5-8.5)
- Monitored production line stages (input, process, output, coding), including batch numbers, expiry dates, and product weight grading
- Applied HACCP principles (hazard analysis, CCPs, critical limits, verification, record-keeping) and studied TACCP vs. VACCP
- Conducted QA in-line checks (labeling, storage temperature, expiry dates, traceability codes) and supported shelf-life estimation, sensory testing, and FIFO/FEFO recall procedures
- Gained working knowledge of PRPs/OPRPs, pest control, preventive maintenance, and SFDA, HALAL, ISO 22000, and FSSC 22000 requirements

Food Safety Inspector — Hajj Project (1447)

May – June 2026

KMAC

- Returned for a second consecutive Hajj season, demonstrating reliability and consistency in high-pressure, high-volume food safety operations
- Oversaw compliance across multiple high-volume food service sites, improving inspection efficiency by applying lessons learned from the prior season
- Applied HACCP principles during field inspections of kitchens and food areas, proactively identifying and resolving hygiene risks
- Prepared daily inspection reports and contributed to refining site food safety protocols based on 1446 findings

Food Safety Inspector — Hajj Project (1446)

May – June 2025

KMAC

- Monitored food safety compliance across multiple food service sites under high-pressure Hajj season conditions
- Conducted systematic field inspections of kitchens and food service areas to ensure adherence to hygiene standards
- Delivered on-site training sessions to food handlers, reinforcing proper hygiene and safety practices
- Prepared detailed daily inspection reports during one of the world's largest annual events

EDUCATION

Bachelor of Science in Microbiology

Expected 2027

Umm Al-Qura University (UQU), Makkah Al-Mukarramah — GPA: 3.33 / 4.00

COURSES & CERTIFICATIONS

- Highfield Level 3 International Award in HACCP — Passed with Distinction, Highfield Qualifications / Guidance Training Institute (July 2026)
- Basics of Food Safety and Hygiene in the Holy State
- Micro-Med Insight: A Volunteering & Learning Campaign
- Occupational Safety and Health Training (OSHA Standards)
- Good Laboratory Practices (GLP) — Aquat Company for Food Industries
- Good Manufacturing Practices (GMP) — Aquat Company for Food Industries
- Food Safety Level 2 — Aquat Company for Food Industries

SKILLS

- Food Safety & Quality:** HACCP Application • GLP & GMP • NCP/NCM Classification • Food Safety Inspection & Compliance
- Laboratory & Technical:** Culture Media Preparation • Microbial Detection & Enumeration • Water & Melanosis Defect Testing
- Professional:** Inspection Report Writing • Cross-Functional Teamwork • High-Volume Operations
- Software & Languages:** Microsoft Office (Excel, Word) • Fluent English & Arabic

ADDITIONAL INFORMATION

Nationality: Saudi National | Languages: Arabic (Native), English (Fluent)
